

California Academy of Sciences.

Post Office Box No. 2247.

San Francisco, Sept 14. 1885-

Dear Dr Gray:

I duly received the papers you kindly sent us and am trying to get the rest through the Antiquarians. I send you our list of desiderata in *Eriogonum*, you see it is a long one, and I shall be very thankful for fragments of all of them you may have to spare. I have one new species which we will send you our next package.

Was *E. panduratum*, Watson, ever published and if so where
" *gracillimum* "

~~1885~~

Found on the beach between San Luis Obispo and Santa Barbara, a plant which I supposed to be *Zostera marina*. — unfortunately in our uncomfortable progress it was lost in the driers, and I fear we shall not soon collect it again. If you can send me a small specimen I will be able to verify my impressions concerning it.

Please present my thanks to Mrs Watson for
kindnesses rendered.

Will you kindly inform me whether
we can purchase desiderata from Dr
Edward Palmer?

Respectfully Yours.,
Mary K. Curran.
